SPORT COMMITTEE 6.03.2018

MINUTES

Present :

Marius TUNDUC, Richard GROSS, Hans-Joachim NÜSSE, Franz MARCHAT,
Tomas J. MONTIEL LUIS, Gilles BERGERON, Leslie BLACKLOCK, Istvan BARDOS,
Christian COSSA, Jan KAWALER, Elena LYUBIMTSEVA, Sudicki ARPAD, Evgen RADKEYVCH,
Jan FILIPI, Ulrich FREI-ZULAUF, Geert PHILIPS

Excused :

Tibor DOHOLUCZKI, Sorin ZAMFIR, Lubomir KUBACEK

s

1. Approval of the minutes of the meeting of 3.10.2017.

The minutes are approved.

2. OLYMPIAD 2019 POLAND :

- discussion about the needs
- solution to the problems of the last Olympiads.

Mr. Tunduc clarifies that already in October 2017 it was decided that a committee of 3 members would be to help solve the problems that the organizer of the Olympiad would experience.

He therefore asks whether Poland can use help.

The deputies from Poland confirm that they have everything under control and that by the end of May 2018 all documents will be sent to the FCI secretariat.

Currently there are no problems with bird flu in Poland.

Mr. Tunduc proposes to have the performance of the pigeons submitted by the various federations online on a website.

All the results can put in on line by the federations.

He confirms that he can make this program available free of charge to FCI.

This is followed by an extensive exchange of views on this subject, in which the following comments are noted

- normally this should start for the Standard
- it must be ensured that the Olympic concept is respected
- it is important that the winning pigeons are exhibited at the Olympiad itself

Ultimately it is decided to not yet introduce this system for the Olympiad January 2019 in Poland.

3. SPORTS CRITERIA:

- **final discussion about the proposal for a new category - 3 races over 500 km - total or 1,800 km - for old birds.**
- **Proposition of the Ukrainian Federation.**

An extensive exchange of ideas about the 5% rule on the distances arises.

Ultimately, it is decided not to change this rule and to mention the full distances in the criteria. At the bottom it will be added that for the distances the 5% rule applies, but not for the total km.

It is confirmed that the 5% rule only applies to the distances of the loft of the fancier, but not to the total number of km that must be reached.

The proposal for an additional category - 3 flights over 500km with a total of minimum 1800km - for old pigeons is approved.

This proposal will be presented to the Congress of January 2019 in Poland and will be applicable on approval from the Olympiade 2021.

The Ukrainian proposition will be treated in October 2018.

4. Proposal from the Italian Federation: Olympic rings - rules and criteria.

Mr Cossa clarifies the letter from the Italian federation - see annex

The majority finds this proposal positive; this will also include a financial contribution to the FCI.

It should be noted that it is still necessary to work out this proposal clearly.

- how many rings a country can sell, taking into account the number of pigeonfanciers per federation.
- how many rings a fancier can buy.

The project will be forwarded to all members of the committee.

5. Presentation of the Portuguese Federation (Mr. José Jacinto) and Mr. Thomas Zimmermann (Gantner Pigeon Systems).

The IT representative of Portugal is not present, so this performance can not continue.

Mr. Thomas Zimmerman then gives a Power Point presentation on mypigeons life.
(a copy of this Power Point is attached to this report)

Then there is a long exchange of views about the new technology and the pigeon sport

The following remarks are noted:

- the pigeon sport must be guided and not followed
- the fancier wants to see his pigeons coming home and is not concerned with technology
- the FCI should have a large server with all data, with the FCI always having the final decision
- the pigeon sport must also take into account the real world and the technology does not stop there

Also the image of the pigeon sport is cited, a image to be worked on.

It is believed that a separate meeting should be held with only this point on the agenda.

6. Request from federation Colombia to organize the World Championship

Mr Gabriel Ferro gives a Power Point presentation about the question of setting up the World Championship in Colombia.

He also states that he has been given the assurance by the authorities in Colombia that the pigeons can enter Colombia, there is only a quarantine of 15 days in the country of origin and 15 days in Colombia.

Also the return to Europe, via Portugal, does not pose a problem.

The meeting approved that the next World Championship will be held in Colombia.

7. Chairman Grand Prix committee.

The meeting is informed that Mr. Dirk Schreel is no longer the chairman of the Grand Prix committee.

After an exchange of views, the meeting decided that Mr. Frans Hermans also held the function of chairman of the Grand Prix committee, this until the Olympiad in Poland in January 2019.

XXXXXXXXXXXXXXXXXXXXXXXXXXXX

"BYBGR RINGS" Project (Blu, Yellow, Black, Green, Red)

The project

To create a competition between different countries with the goal to promote participation and exclusivity. A way to give value and attraction to the International Federation.

How

Each Olympic year, the FCI will produce 500 special rings for each country. The rings should be exactly the same for every country. The 500 rings should be delivered to every Federation that will apply their criteria to distribute it to fanciers. Every ring will cost 10€ to every federation and 15€ to every fancier.

EVERY OLYMPIC SHOW there will be a special category for this kind of pigeons: the first year they could participate to youngsters category and to standard category.

IN THE NEXT EDITIONS OF OLYMPIC exhibitions the FCI will create Cat. A, B, C, etc. specially reserved for pigeons with this kind of rings. Only the 1st in each category will win the price, whatever sex the pigeon should be.

Why

Everybody knows the fame and the relevance of Olympic pigeons in each country: a goal of a whole pigeon life. But this is not a competition fair enough for everyone: who race with high numbers of pigeons or in particular environment could have higher opportunities to have special and winning champions.

Bybgr rings are different. It's a way to give worldwide fame to special fanciers that could choose special pigeons starting directly from the nest. And after ringing the future champions this special fanciers should be able to prepare this pigeons and to manage them to let be the future champions.

Race Results

Europe	MOULI EAST
Hungary	Israel
Romania	Qatar
Slovakia	United Arab Emirates
Sweden	Asia
	Bangladesh
Africa	India
South Africa	

**Realtime and
Independend**

- * Calculate & Publish Results with 1 Click
- * Electronic Data Import from various ETS-Brands
- * Easy to use for Administrator and Fanciers

Results & Competitions

- * Official FCI Results or custom Race Results just as you need it
- * Custom competitions based on Point systems or coefficients
- * Absolute transparency with easy way to check if calculated data is correct
- * Automatic daily recalculation of Competitions

Benefits for Fanciers

- * Easy Registration / Login
- * Easy access to manage Pigeons
- * Sortable list of all successful pigeons with complete race records
- * Printing individual race achievements
- * Distance calculation Tool
- * Publish and Share on Social Media

and many more....

Pair Your Account

Connect Your Account to Fancier record and access detailed Performance reports for all of your Pigeons

[Connect my account](#)

Features

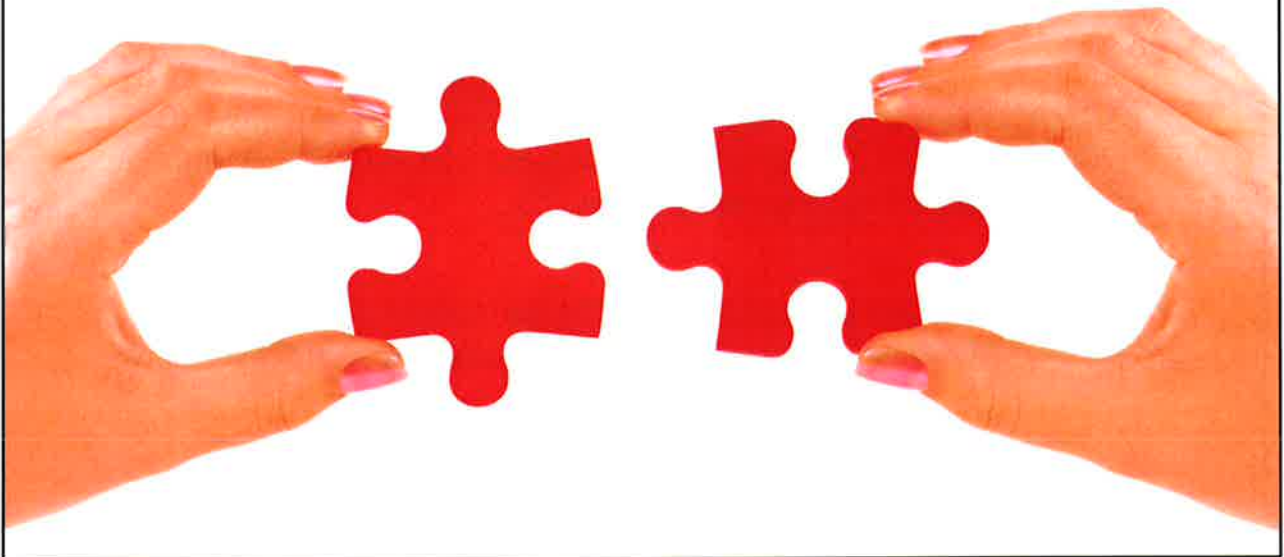

- * Unique worldwide fancier ID to be used in different applications
- * International Lost Pigeons Database with Online Reporting Tool
- * Automatic Reporting of Arrivals
- * Supports FCI approved Home Evaluation from various ETS
- * Cage Card Printing
- * Google Maps Integration

More to come in 2018

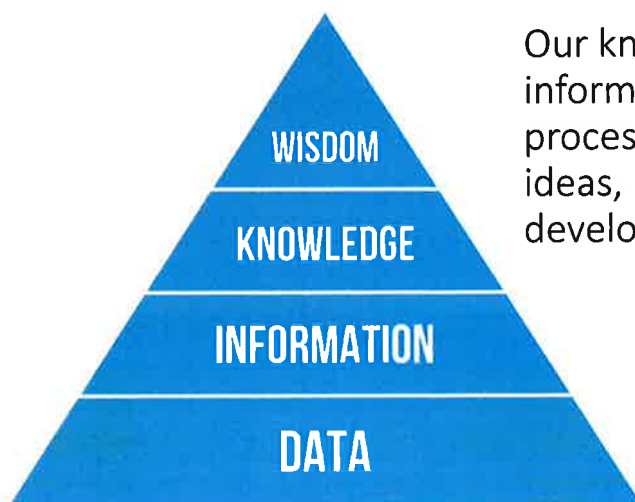

- * Online Basketing (January 2018)
- * Pedigree Tool for Fanciers (1 Qu. 18)
- * Online Auctions (December 2018)
- * Vaccination History (January 2018)
- * Pooling System (on request)

CONCLUSION

From Data we construct information and from information we construct knowledge.

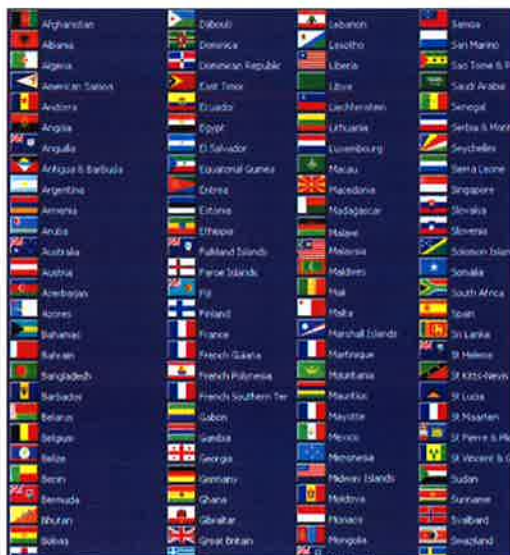

Our knowledge is an interpretation of information to make use of it and processing the information to shape new ideas, opinions and future actions and we develop our knowledge through this.

THE KEY

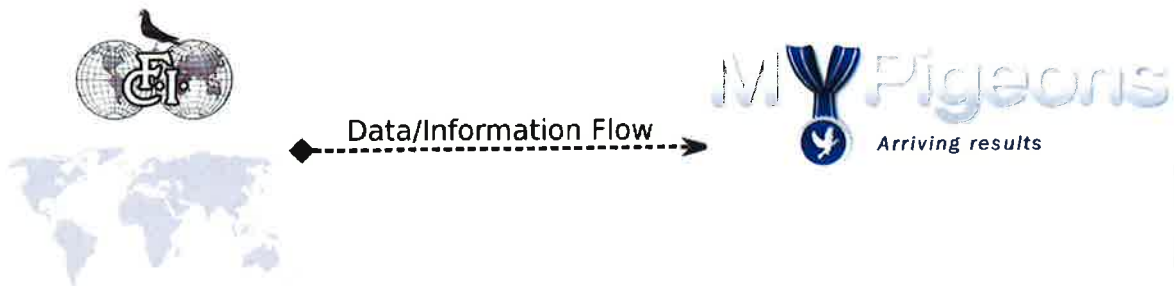

- BENZING offers with MyPigeons.live an independent and easy solution to create an international database including all information about classifications, pigeons and fanciers.
- This tool is the key and solution for the member states and as well for the FCI to have an instrument working competent and powerful

OUR GOAL IN PARTNERSHIP WITH THE FCI

International
Database

Collecting results for up to date FCI International Competitions

MyPigeons is ready to receive race data from
FCI countries in a simple way !

What is possible ?

- **RESULTS AND CLASSIFICATIONS**
 - FCI Classifications
 - World Championship
 - Olympiade
 - New Competitions for the Future ?
- **LIBERATION MANAGEMENT**
 - Avoid collisions of Pigeons

What is possible ?

- **International Pigeon Database**
 - Footring – Database (Unique numbers)
 - Chipring – Database (Security about Cloning)
 - Pedigree and Breeder Information
 - Valid results and transparency
- **International Fancier Database**
 - GPS Coordinates
 - Statistics
 - Results
 - Networking
 - Buy/Sell
 - Social Media / Marketing / Events

And many more

„The aim of big data is to minimise the risk of a failed forecast by collecting as much data as possible.“

„And, as we will see, this can enable those in control of big data to perform feats and visions that would not have been possible before.“

„Brian Clegg“

References from Longterm Partners

In 2015 Hungarian Racing Pigeons Sport Federation began to use MyPigeons system for National Championship calculation.

From 2016, all our districts calculate official results for entire season with this system. Also we are taking advantage of a wide range of possibilities of admin accesses (ETS imports, manual input etc).

MyPigeons is not only about making results lists but we also manage members database, lost pigeons reports, release points database, publishing start videos etc. Our members can find official FCI competition results, cage cards, handle own pigeons and their status, freely view or share results of their competitors. All the Features available from any platform in 24 hours.

A new way we started and we strongly believe this is the right way of integrated, modern and upgradeable system which gives a strong support to our members in their pigeon sport activities.

István Bárdos

President of Hungarian Racing Pigeons

Sport Federation

MyPigeons is official calculation software for Slovak federation of racing pigeon fanciers since 2014. Its implementation was very successful step for faster, more precise and more transparent race results. Automatic calculation of FCI categories, national championships and international competitions throughout the season became very popular among fanciers.

Automated coefficient selection and exhibition sheet creation helped to unburden our fanciers from unnecessary administrative tasks.

Centralized database of fanciers, race plans, liberation points and broad set of tools that come with MyPigeons became very important part in process of control and regulation mechanism for responsible way of competing within FCI
