<p style="text-align: center;">The decisions of the VETERINARIAN COMMISSION ratified by the 2001 CONGRESS</p>
--

NEWCASTLE DISEASE :

Advices for the affiliated countries :

- Introduce the obligation to vaccinate
- The vaccine to be used will answer to the national veterinarian directions. **The attenuate vaccines are forbidden.**
- The vaccination must assure a **12 months** protection.

FCI Events

All the affiliated countries have to show attestations which confirm that the engaged pigeons and the pigeon families are sufficiently immunized against the NEWCASTLE DISEASE.

The documents will include **the vaccination dates** as well as the name of the used vaccine.

The vaccination must be done within the last **12 months**

They also ask for a health attestation of the loft concerning the following details :

Parasitology : total absence of salmonella, vermin and coccidiosis.

The same attestations will also be requested for the « one-loft races » within the FCI.

Another advice for the affiliated countries : obligation to immunize against the pigeon pox virus
